Google Cloud H2S

AI Builder Cup

Build in JAPAC.
Build for the world.

Team Details

a. Team name: Git Outta Here (Teo Zen Ben, Jeanette Tan En Jie, Thevesh A/L Chandran, Lau Zheng Hao)
b. Team leader name: Teo Zen Ben
c. Problem Statement: Future of Work & Enterprise Productivity. Event teams spend ~3 months planning each event by hand.

Brief about the idea

AN EVENT OF THIS GLOBAL SCALE

takes months

W1	W2	W3	W4	W5	W6
W7	W8	W9	W10	W11	W12

proposals, sign-offs, 100s of emails...

BUT WHAT IF IT TOOK

05:00

MINUTES

Proposal, budget, speakers, sign-offs. **One prompt.**

Movents is a team of Gemini agents that plans a whole university event from one prompt: proposal, budget, speakers, sponsors, risks and promotion, checked and sent for sign-off.

Opportunities: how it is different, how it solves the problem, USP

HOW IS IT DIFFERENT FROM EXISTING IDEAS?

EXISTING TOOLS (CLICKUP, CAMPUSGROUPS, LUMA)	MOVENTS
You do the planning. The tool only tracks it.	**The agents do the planning. You review it.**
Generic templates.	**Follows your university's own SOP.**
You search for speakers and prices yourself.	**Finds real ones, each with a source link.**
Approvals chased over chat and email.	**Built-in sign-off chain, logged.**
Nobody checks the plan until it's too late.	**Checks budget, deadlines and sections first.**

HOW WILL IT SOLVE THE PROBLEM?

One sentence replaces ~25-30 hours of committee admin.

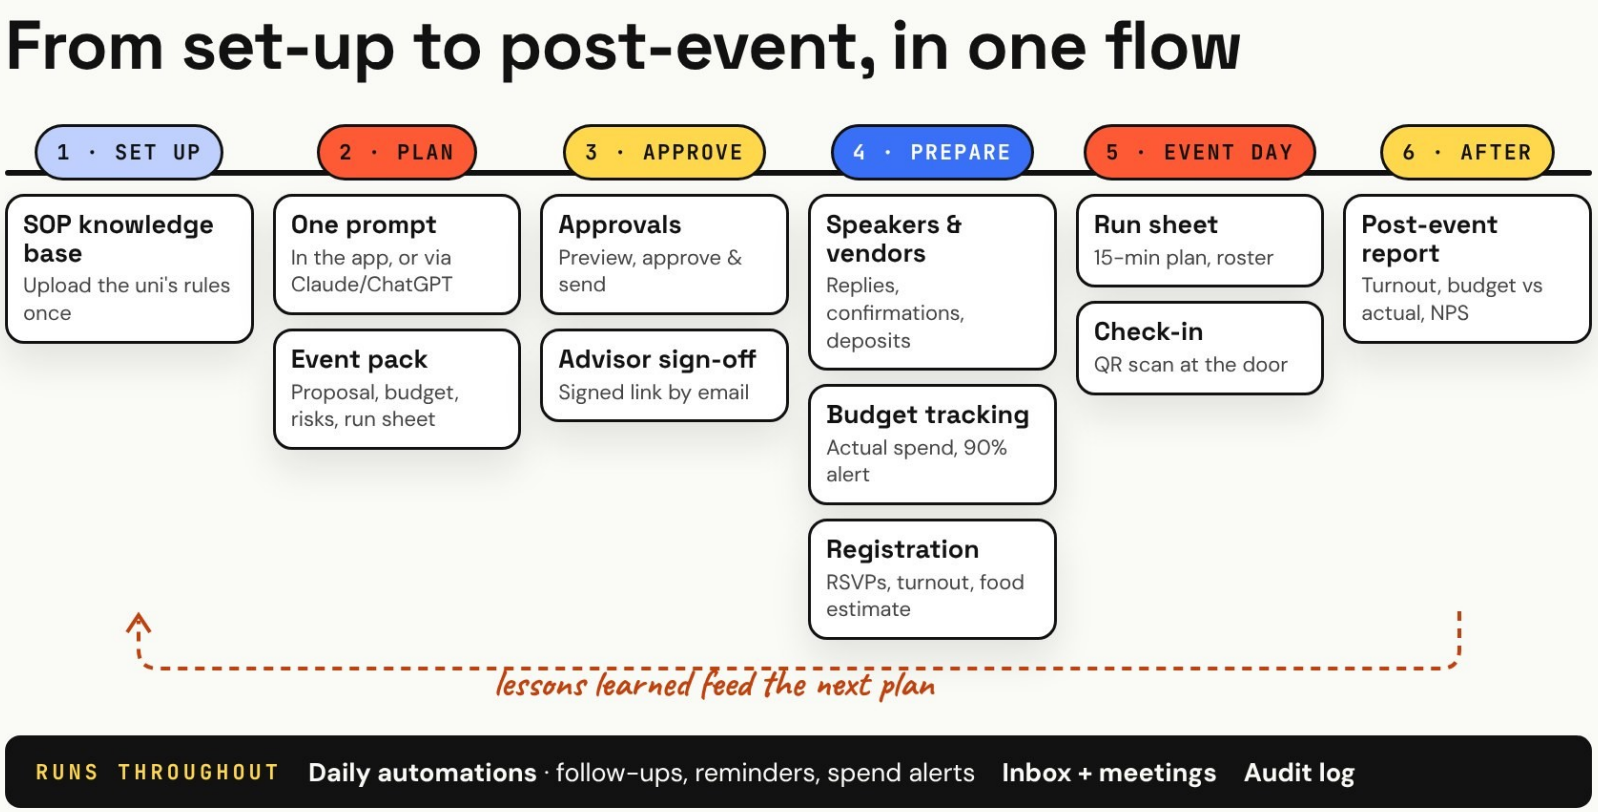

Deadlines are worked out from the SOP, so none are missed.

The budget is checked against the cap before anyone sees it.

USP

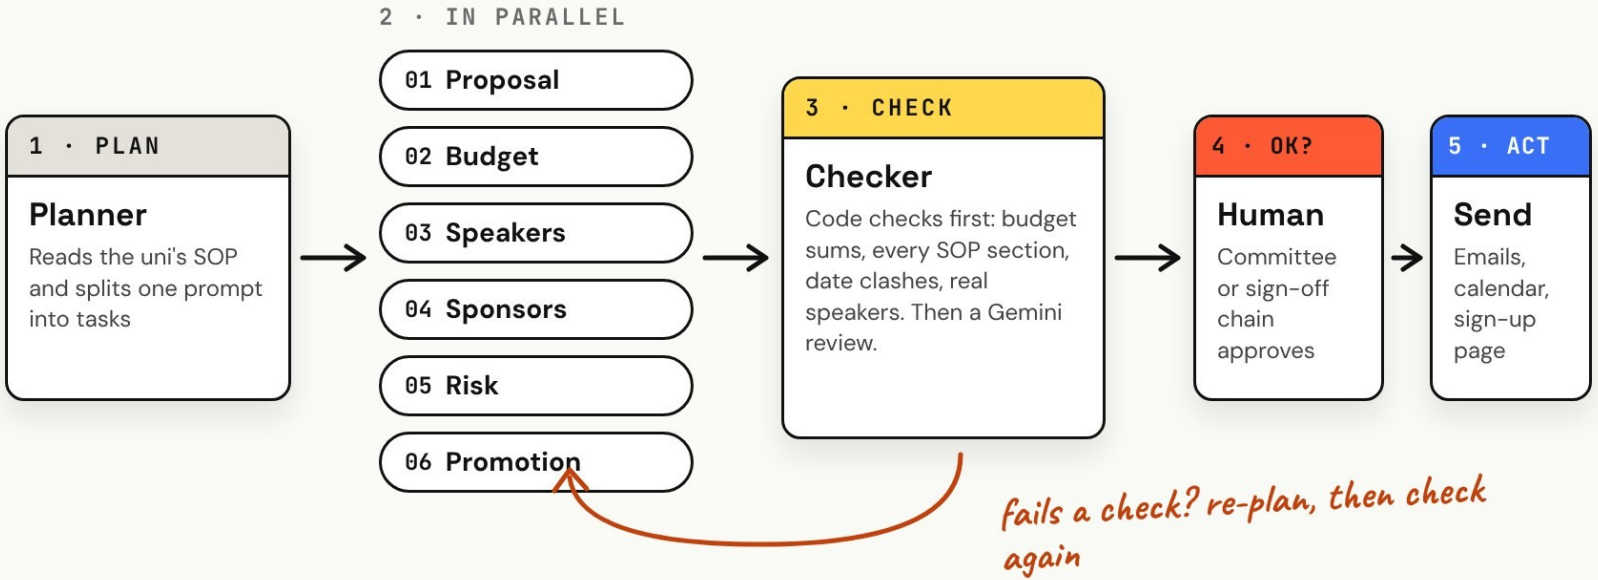

The only tool that plans the **whole event** in your university's **own format**, and **checks its own work** before a human signs off.

List of features offered by the solution

Process flow diagram or Use-case diagram

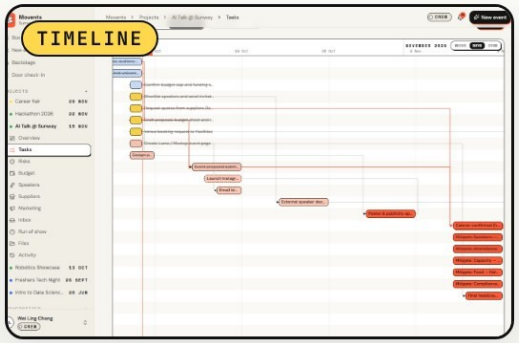

Gemini agents that check their own work

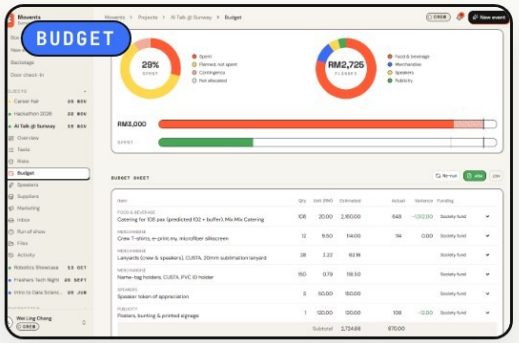

Every step is logged to an audit trail · Nothing is sent without an approver's sign-off

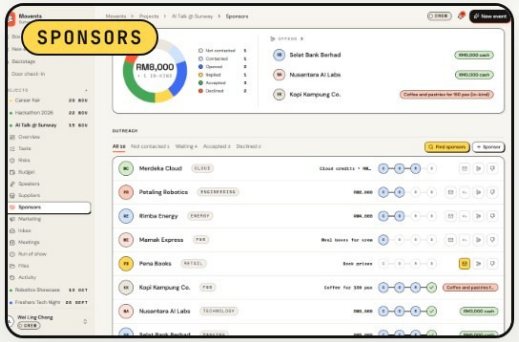

Wireframes/Mock diagrams of the proposed solution (optional)

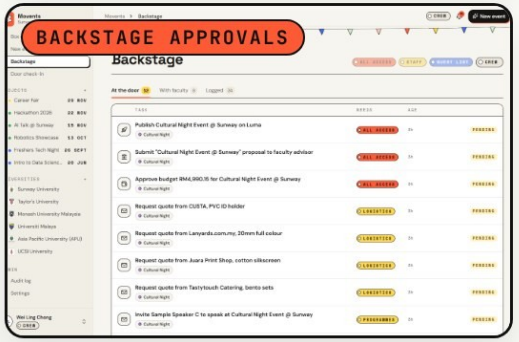

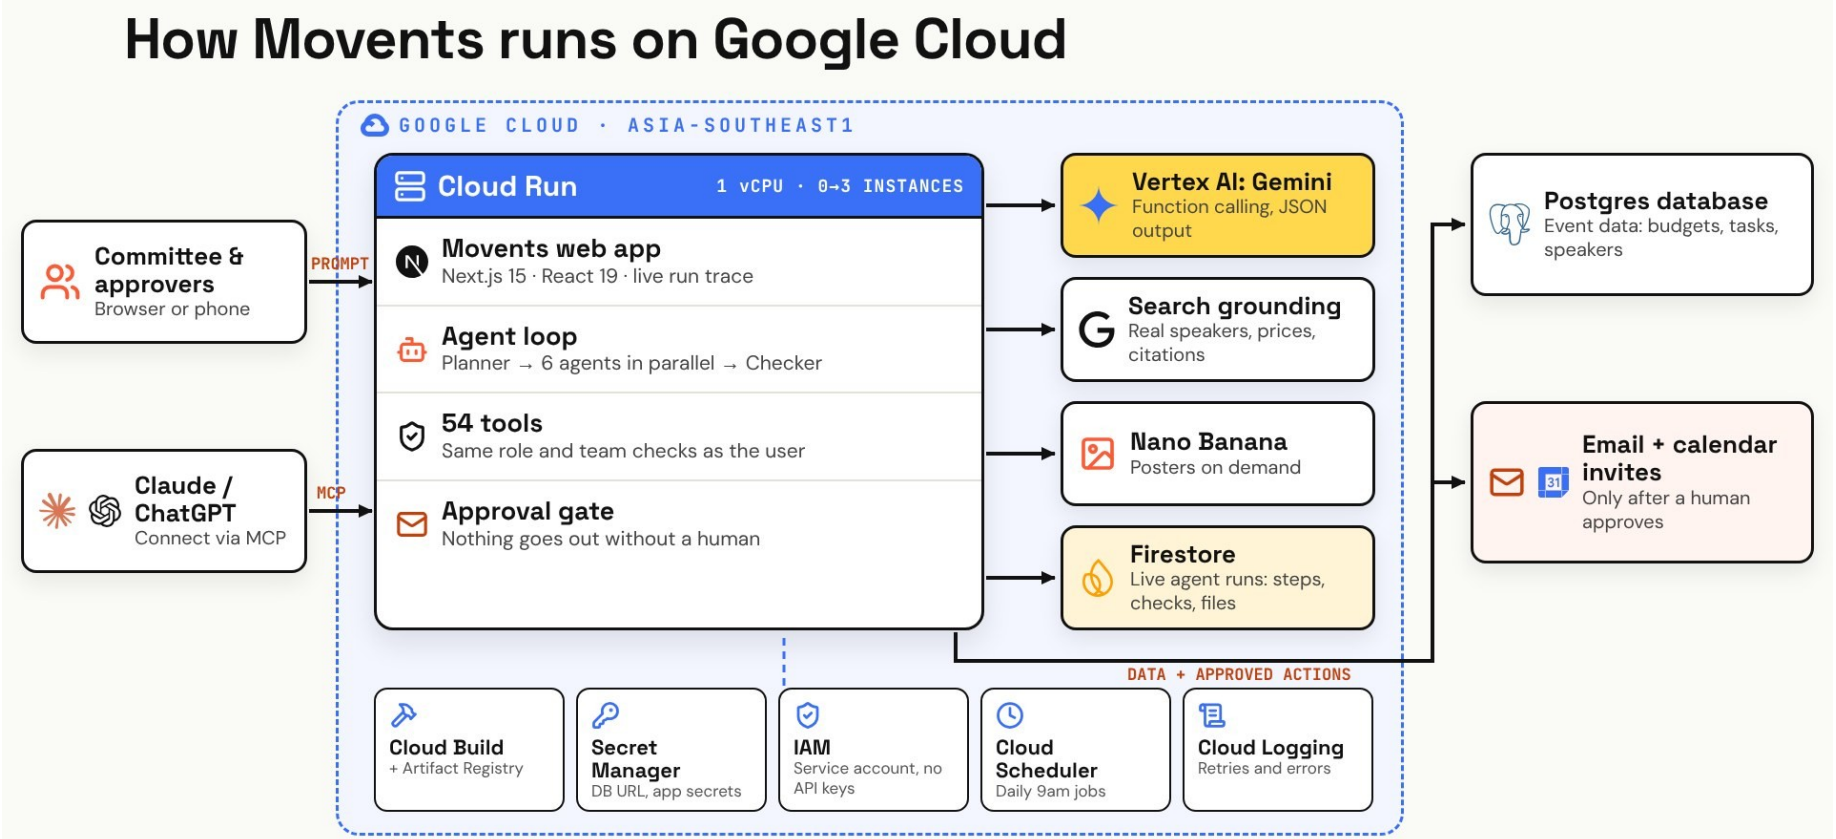

Architecture diagram of the proposed solution

Technologies to be used in the solution

Built on Gemini and Google Cloud

AI · GEMINI ON VERTEX AI

- Gemini 3 Flash (multi-agent)
- Function calling + JSON output
- Google Search grounding
- Nano Banana images

HOSTING · GOOGLE CLOUD

- Cloud Run (asia-southeast1)
- Cloud Build + Artifact Registry
- Secret Manager
- Cloud Scheduler · IAM

APP & DATA

- Next.js 15 · React 19
- TypeScript · Tailwind CSS
- Firestore: live agent runs
- Postgres: event data

Demo video voice and music: Gemini text-to-speech and Lyria

Estimated implementation cost (optional)

What it costs to build and run

TO BUILD (ONE-OFF)	
Team: 4 members, own time	RM0
Stack: Next.js, Postgres, open source	RM0
Postgres database (free tier)	RM0
Gemini + search while testing	~RM50
Total cash to build	~RM50

TO RUN, PER EVENT PLANNED	
Gemini on Vertex AI (7 agents)	RM2.47
Google Search grounding	RM0.82
Cloud Run (scales to zero)	~RM0.20
Cost per event plan	~RM3.50

PILOT: 100 CLUBS / MONTH	
200 event plans × RM3.50	RM700
Database paid tier (US$19)	RM78
Secret Manager, Scheduler, Firestore	~RM2
Total per month	~RM780

Estimates from Google Cloud list prices · Cloud Run: 1 vCPU, 1 GiB, min 0 / max 3 instances · US$1 = RM4.10

Estimated implementation cost (optional)

Three tiers, profit on every club

GENERAL ADMISSION **Free**	**Every club** Proposal, budget and approvals in your uni's format
VIP **RM49/mo**	**Busy clubs** Speaker outreach, follow-ups, registration, reports
BACKSTAGE **RM15k/yr**	**Whole campus** Student affairs dashboard, SOP upload, audit log

90% want it, can pay

ONE VIP CLUB, ONE MONTH

Gemini AI agents	RM14.80
Web search	RM4.90
Cloud Run, database, email	RM4.90
Card fees	RM2.50
Our cost (busy club, 6 events)	RM27.10

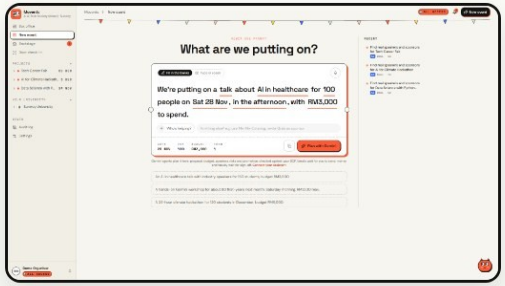

RM49 price - RM27.10 cost **+RM21.90**

profit per club, every month (45%). A typical club running 2 events nets ~RM38.

90% = clubs we demoed to · Costs: our estimate (Gemini Flash list price) · US$1 = RM4.10

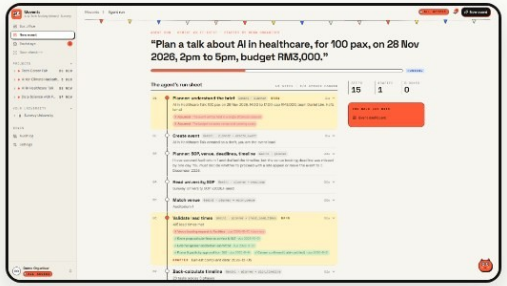

Snapshots of the prototype

Live on Google Cloud, end to end

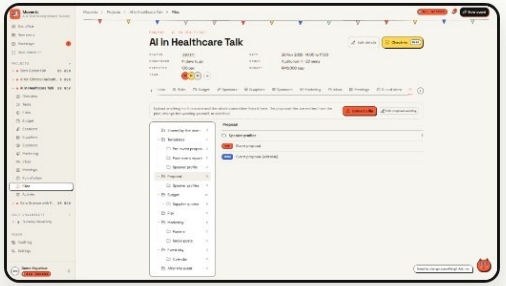

1 · One prompt in

Fill in the blanks, hit Plan with Gemini

2 · Agents plan it live

Checks lead times, adapts when one fails

3 · The event pack

Proposal PDF and Word, budget, risks, marketing

TRY IT LIVE · NO ACCOUNT NEEDED

movents-743449161087.asia-southeast1.run.app

Code: github.com/ZenBen5173/movents-ai-builder-cup

Prototype Performance report/Benchmarking

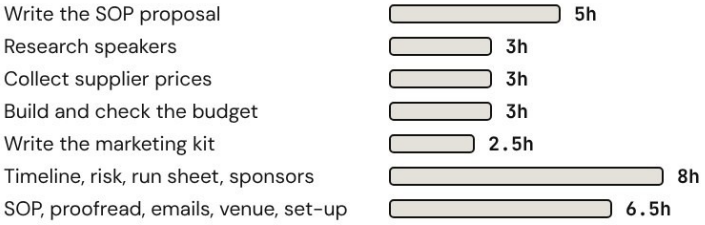

How the prototype performs

BENCHMARK: ONE EVENT, BY HAND VS MOVENTS

BY HAND
~3 months
12 weeks of chasing and waiting

MOVENTS
2-3 min
to a full, checked plan

~31 HRS OF THAT IS HANDS-ON WORK MOVENTS DOES

2-3 min
full plan, one real run on the live site

8
actions queued for approval in that run

2 errors
caught and fixed by the checker (catering 119 vs 150)

1.4-1.8 s
live server response, 3 checks today

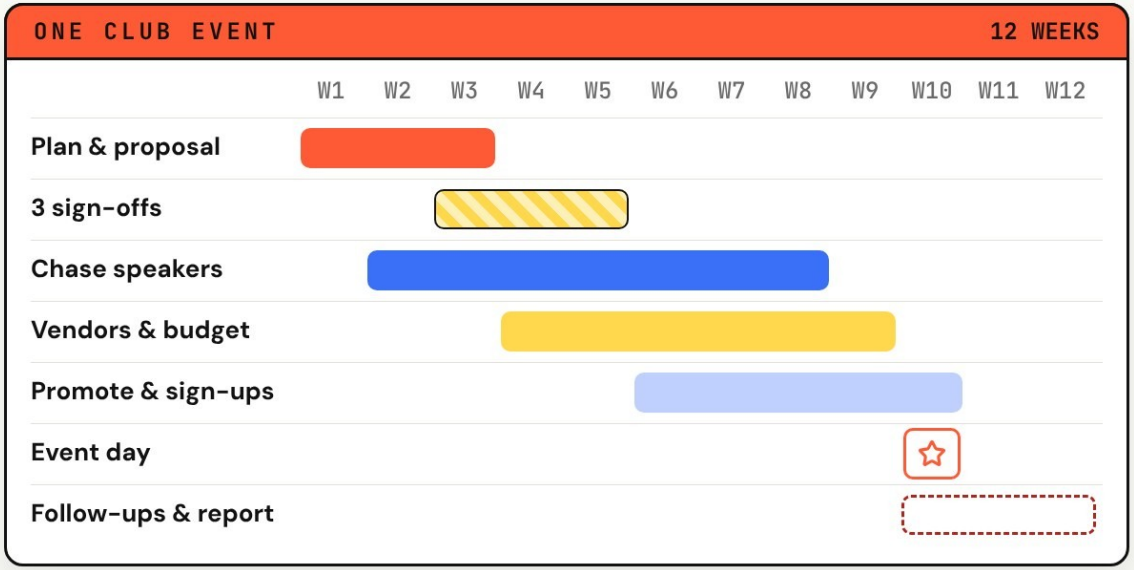

68 tests
automated, across 10 suites

3 models
fallback chain + rule-based planner if Gemini is down

3 months: our club events · Hours: estimates in brief.ts · Run: README, live site

Additional Details: the problem we lived

Every event takes months of work

~3 months

to plan, approve, chase, promote and follow up. **Club talk or hackathon, same story.**

all by hand, every single time

Typical timeline from the club events we have run · Sign-off and report deadlines: UOW Malaysia KDU clubs handbook

Additional Details: the market

We start with student clubs

ONE CAMPUS
80+
student clubs at Sunway University

→

ONE COUNTRY
312
campuses in Malaysia, ~15,600 clubs

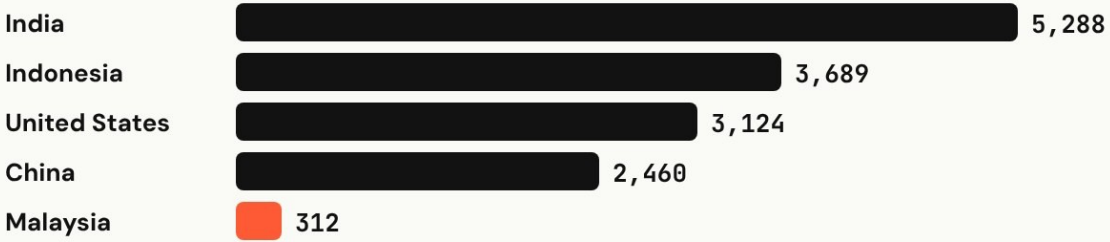

→

THE WORLD
32,000+
campuses, with 269M students

→

THE MARKET
1.6M+
student clubs, all planning by hand

CAMPUSES PER COUNTRY

Works for any event team. Student clubs are where we start.

a huge market, and no one is serving it

Sources: Sunway University · Webometrics 2026 · UNESCO 2024 · clubs = campuses × 50 (our estimate)

Additional Details: early interest

96 Sunway clubs already want in

96 of 136 clubs
+ 4 partners said yes

Clubs from student.sunway.edu.my (Oct 2026) + 4 partner clubs · Orange = saw the deck and demo, said yes · Grey = not yet asked

Additional Details: competitor analysis

The judges' scorecard

WHAT CLUBS NEED	☆ Movents	ClickUp	CampusGroups	Luma, Meetup	ibl.ai
Follows your uni's own SOP	Yes	No	Partly	No	Partly
Drafts proposal + budget	Yes	Partly	No	No	Partly
Finds + emails speakers	Yes	No	No	No	No
Role-based approvals	Yes	Partly	Yes	No	No
Made for student clubs	Yes	No	Yes	Partly	No
Price	Free club tier	Per user	~US$8k/yr	Free–US$59/mo	Pilot from US$15k

the only one that ticks every box for a student club

Future Development: vision and scale

Any event team. Starting with clubs.

FEASIBLE NOW

- ✓ **Working prototype**, live on Cloud Run
- ✓ **100 clubs** said yes to a pilot
- ✓ Built by student leaders behind **50+ events**
- ✓ **Pays its way:** free for clubs, RM49/mo for busy clubs, RM15k/yr per campus

SCALES BY DESIGN

- ✓ **New uni = upload its SOP.** No new code
- ✓ **Cloud Run autoscales**; Postgres keeps each campus separate
- ✓ Next: **campus offices, companies, NGOs**, any team that runs events

SUNWAY · SUBANG & PJ · KLANG VALLEY · THE WORLD

OUR VISION No event team loses months to paperwork again.
